

# Protolift

A manual lifter for manhole covers

The PROTOLIFT is a tool that minimizes the effort for the lifting of a manhole cover up to 250 pounds. This apparatus is a great help towards reducing back injuries. The PROTOLIFT only weighs 12 1/2 pounds, has a rubber handle giving it a firm grip. This is one example resulting from our Research and Development services.

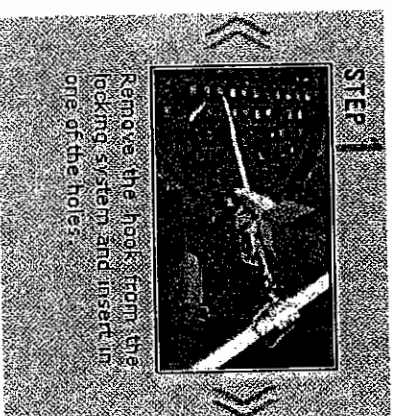

- > **ADVANCED DESIGN FOR YOUR SAFETY**  
Protolift is a back saver
- > **ADVANCED DESIGN FOR YOUR EFFICIENCY**  
Protolift will help you lift a manhole cover with a minimum effort
- > **ADVANCED DESIGN FOR ITS SOLIDITY**  
Protolift is of steel and design to last for years
- > **ADVANCED DESIGN FOR YOUR SAFETY**  
Protolift weighs only 12 1/2 pounds it has a special handle for better grip. The hook locks in the handle when not in use.
- > **ADVANCED DESIGN FOR ITS ADAPTABILITY**  
Protolift has a hook that can be placed to lift all cover with a hole. It is also designed to remove ice or dirt.
