Model: DSP-C1 (Plated Steel) & DSS-C1 (Stainless Steel) Flush Floor Sleeve for Fresh Concrete - The Pelsue Model #DSP-C1 & #DSS-C1 Floor Sleeve is designed to be installed in a freshly-poured concrete floor surface. The sleeve provides a fixed receiver for any PELSUE Brand offset arm or davit system. After installation, the installed sleeve is flush to the floor’s surface thereby eliminating any protruding object or potential trip hazard. Caps can be purchased separately in order to seal off the receiver hole when not in use.

General Specifications:

**Product is Designed & tested to be used in 2 General Applications:**

1. As a mounting point for an offset davit system to be utilized as a personnel or equipment lowering, lifting, and positioning device.
   **Man Rated Load Capacity**...........350 LBS. (159 KG.) Maximum at up to a 48” offset
2. As a mounting point for an offset davit system to be utilized as an anchorage for a personal fall arrest system.
   **Compliance**............Designed and tested as an Anchorage for the attachment of Personal Fall Arrest Equipment as per OSHA Regulations (Standards 29 CFR) Part 1926

**Warning!** A 900 LB. maximum arrest force fall arrest device must be used when this product is employed as part of a complete fall arrest system.

Materials & Construction:

**General Construction**.......Welded Carbon Steel (DSP-C1) or Welded Stainless Steel (DSS-C1)

**Anti-Friction Components:**

- Grey PVC Slip Plate & ABS Plastic Friction Sleeve

**Weight:**

Weight...........22 LBS.

Mounting Requirements:

**Concrete Strength:** 2000 PSI

**Concrete Thickness:** 6 inches (152 mm)

**Concrete Reinforcement:** Single 1/2 inch (13mm) Diameter Steel Rebar on 12 inch (305 mm) Centers Lateral and Longitudinal

**NOTE - The Mounting Requirements shown on this document are guidelines for safe-installation. Consult the Proof Load Table in this document & have concrete & installation of system approved by installing engineer.**

*Proof Load is defined as the load attained on the structure and sustained by the structure for a period of 2 minutes with no visible signs of structural failure.

**Compliance is dependent upon usage of product within manufacturer’s guidelines and in conjunction with only approved PELSUE brand equipment and sub components.

***Ratings are arrived at by PELSUE engineering taking into account test data for each structure, applicable and relevant governing standards, and overall good sense. Ultimately, published ratings should be used as a reference allowing the end user to arrive at a comfortable Factor of Safety based upon usage conditions and experience.

**ALL DIMENSIONS IN INCHES UNLESS OTHERWISE STATED**
