Product Specifications

Model: FB-SW3 Fall Arrest Post Base Plate With Tie-Off Anchor, 2-Ear Pin Mount - Weld-On

General Specifications:

1. The FB-SW3 Fall Arrest Post Weld-On Base Plate is intended to be permanently attached upon structural steel members and be used with any one of Pelsue’s removable mounting Fall Arrest Posts.

2. Plate is to be welded on to surface adhering to all PELSUE guidelines.

Materials & Construction:

GENERAL CONSTRUCTION:........ WELDED CARBON STEEL
WELD CERTIFICATION:............... AWS - D1.1
MATERIAL:.................................... ASTM A36 STEEL

Dimensions:

GENERAL DIMENSIONS:............ LENGTH - 9.0"
                              WIDTH - 8.0"
                              HEIGHT - 2.9"

WEIGHT:........................................12 LBS. (5.5 KG.)

Strength & Testing Data:

TORSIONAL PROOF LOAD:.........20,274 FT.-LB. (27,488 N-M) AT PIN HOLE CENTER
EQUIVALENT LOAD & ANGLE:.... 5400 LB. (2449 KG.) TENSILE FORCE APPLIED AT A POINT 55 INCHES (1.4 M) ABOVE PIN HOLE CENTER AT AN ANGLE OF 55 DEGREES OFF OF VERTICAL.
RATING:........................................ 3 PERSON FALL ARREST ANCHORAGE WHEN USED IN CONJUNCTION WITH AN APPROVED FALL ARREST POST AND 900 LB. MAF DEVICES ON ALL CONNECTIONS AND INSTALLED ACCORDING TO GUIDELINES BELOW

Mounting & Installation Requirements:

!WARNING! - FAILURE TO COMPLY WITH MOUNTING REQUIREMENTS WILL VOID ANY WRITTEN OR IMPLIED RATING AND COULD RESULT IN SERIOUS INJURY OR DEATH

1. The base plate must be welded to the supporting structure by a qualified & certified welder following prescribed AWS procedure & protocol.
2. The base plate must be welded with 5/16" (8 MM) continuous fillet weld all around the four sides of the base plate.
3. It is the user’s responsibility to ensure that the supporting structure to which the base plate is attached is capable of withstanding and supporting the base plate’s reported proof loads. Failure to do so will void any system rating.
4. In order to comply with all standards and stated ratings, the FB-SW1 Base Plate must be installed by a certified welder following the requirements given within PELSUE Document 500588-001; "Guidelines for Installation of PELSUE Brand Weld-On Fall Arrest Post Base Plates." Failure to follow guidelines will negate all claims of compliance and/or certification
